

A PERFECT SOLUTION... ANYTIME, ANYWHERE
NichiBoard™

NichiBoard™ — Cedar

The classics never go out of style. The traditional beauty and character of smooth and cedar textured lap siding is as popular today as it was in earlier times. The choice of smooth or deep grain cedar texture and the variety of lap widths makes NichiBoard™ the ideal choice for low-maintenance and high-profile curb appeal. Available in six widths and twelve-foot length boards, NichiBoard™ is easy to handle and installs quickly.

A CLOSER LOOK
 TECHNOLOGY

Looking great from the curb is easy. We encourage people to take a much closer look. It's only on closer examination that you'll start to really understand what separates Nichiha from the pack. Up close is where our clean edges and deeper, more realistic textures have their greatest impact. What enables us to accomplish this is Nichiha's proprietary state-of-the-art manufacturing process that uses over one million pounds of pressure. Our process creates a deeper pattern, denser shadow lines and a more realistic texture.

When you combine a superior manufacturing process with the highest level of material composition technology, you get better products. Nichiha has used their more than 35 years of experience of developing and working with fiber cement mixtures to create products that look great, are durable and use over 50% recycled content. All of this adds up to a lifetime of value.
