

BEAUTY WITHOUT COMPROMISE

NichiShake™, NichiStaggered™ and NichiStraight™

NichiShake™

NichiStaggered™

Everything you love about cedar. NichiShake™ delivers all the warmth and charm of traditional cedar shakes, without the tricky and timely installation process and the lifetime of ongoing maintenance. The deep grain and variable-sized individual shake boards make NichiShake™ almost impossible to distinguish from real cedar. Its total lack of upkeep issues make it impossible to resist.

NichiStaggered™ and NichiStraight™ - These cedar textured shake panels have the authentic look of individual shakes and offer a quicker installation. The panels are 5/16 inches thick, which is 25% thicker than other fiber cement shake panels. Both shake panels have all of the benefits of our NichiBoard™ siding: deep grain texture, high concentration of recycled content and a lifetime limited warranty*.
